#### EXHIBIT 3

## Feature Release Plan DRAFT

Attached is the first draft of the feature release plan for front-end navigator development. Most of the features presented in this plan are currently under consideration by the steering committee. Several have already been approved.

It is up to us to decide how much time and effort is required for each item and who should be responsible. We will try to have a meeting next Wednesday afternoon, March 20th to discuss this plan in detail.

In the meantime, feel free to call me with any questions or comments.
